The restoration process

1. **Diagnosis and Counseling:** We first assess the condition and state of your timepiece and outline the various steps that will be required during the restoration process. Our group will then detail their treatment and provide an estimate.
2. **Reconstruction and Cleaning:** The timepiece is completely disassembled, and every piece is cleaned to remove dirt, oils, and debris from the parts that may affect its working.
3. **Replacement and Repair:** Damaged or worn parts are finished fine and precise to reintroduce the mechanical integrity of the watch.
4. **Case and Dial Smoothing:** Scratches and blemishes on the case and dial are addressed as such that your watch regains its original luster.
5. **Reassembly and Testing:** After the restoration process, the watch would be assembled again and cautiously put to the test to achieve great performance and accuracy.
