### Detailed Watch Service Process

We analyze your watch and recommend the necessary services with it. Your timepiece is meticulously deconstructed and ultrasonically cleaned in parts. Reconstituted authentic replacement parts will repair your watch and help your timepiece maintain its integrity. Each moving part has the correct lubrication applied in order to minimize frictional contact. It's reconstructed precisely and carefully to keep smooth operations in it.

We do extensive testing, including tests for water resistance and accuracy, to make sure your watch is running at its best. A professional polish will have your watch looking like new again.
